BUSINESS INCOME

Understanding what is, and is not, business income will help you determine how to account for it on your tax return. You can have business income even if you are not involved in the activity on a regular full-time basis. Income from work you do on the side in addition to your regular job can be business income. Business income includes amounts you received in your business that were properly shown on Forms 1099-MISC. This includes amounts reported as nonemployee compensation in box 7 of the form.
